

[Faker.js – Tool To Generate Fake Data For Testing](#)

A screenshot of a web browser displaying the Faker.js website. The browser's address bar shows "http://www.bashooka.com". The website header features the "JSON Schema Faker" logo, which includes a character in a top hat. Below the logo, a description states: "JSON Schema Faker combines JSON Schema standard with fake data generators, allowing users to generate fake data that conform". There are several status indicators: "Donate PayPal", "build passing", "npm package 0.5.0-rc15", and "Star 1,488". Navigation links for "Options", "Reference", "Examples", and "Community" are visible. A code editor window is open, showing a JSON Schema definition for a "Faker-fake" property. The code is as follows:

```
1- {
2-   "type": "string",
3-   "faker": {
4-     "fake": "{{(name.lastName)}, {{(name.firstName)}} {{(name.suffix)}}"
5-   }
6- }
```

[Faker.js – Tool To Generate Fake Data For Testing](#)

In this article, we discuss how to use Faker.js in order to generate data to test our Node.js applications.. js is a javascript library for generating fake data. - Fake data is useful when building and testing our application. - The faker.js can generate fake If you're unlucky, you're left generating dummy data using garbage inputs (random strings, random numbers, etc) – data that passes the regex, generate massive amounts of realistic fake data in Node.js and the browser - Marak/faker.js. ... faker.js contains a super useful generator method Faker.fake for combining ...
